

Inner Source from the Trenches

INNER SOURCE is an emerging paradigm of software development that aims to adopt best practices and tools from successful open source software development projects. Many companies are adopting Inner Source initiatives, but much uncertainty remains about how to go about.

Thursday 19 Feb 2015
Time: 10:00 – 14:00

Location:
NUI Galway
J.E. Cairnes School of
Business & Economics
Room CA-243

dara.oconnor@lero.ie

Expert Speakers

VIJAY K GURBANI is a Distinguished Member of Technical Staff in the Computer Systems and Security Research group in the Enabling Computing Technologies Domain at Bell Labs, Alcatel-Lucent. Gurbani was the principal developer of the SIP stack, a project that was run as an Inner Source initiative.

DIRK RIEHLE is the Professor of Open Source Software at the Friedrich-Alexander University of Erlangen-Nürnberg. Before joining academia, Riehle led the Open Source Research Group at SAP Labs, LLC, in Palo Alto, California, including SAP's Inner source initiative.

DERMOT HUGHES is program manager at Ericsson, and responsible for Inner Source innovation at Ericsson. Hughes has led numerous development teams and has extensive experience with outsourced suppliers.

JOHN LANDY is Lead Product Owner for a group championing inner source community development, promoting re-use and contribution across Ericsson R&D.
